VITOR GABRIEL DA SILVA ALVES

SOFTWARE ENGINEER | FRONTEND TECH LEAD | FULLSTACK DEVELOPER

Natal, RN — Brazil • vitorg135@gmail.com • github.com/vitorgabriel27

Education

Universidade Federal do Rio Grande do Norte (UFRN) — Natal, RN
Computer Engineering — 2025 - On Going

Universidade Federal do Rio Grande do Norte (UFRN) — Natal, RN
Science and Technology — 2019 - 2024

SENAI – Serviço Nacional de Aprendizagem Industrial — Natal, RN
Industrial Automation Technician — 2016 – 2017

Professional Experience

Geowellex do Brasil Serviços Petrolíferos — Natal, RN
FullStack Engineer | Frontend Tech Lead — 10/2022 – On Going

- Led frontend architectural decisions for a complex geological analysis platform used in the oil & gas industry
- Designed scalable and modular frontend systems using React, TypeScript, and DDD principles
- Participated directly with the CTO in defining and implementing a new software architecture based on Clean Architecture and Domain-Driven Design
- Mentored developers during architectural migrations and codebase modernization
- Built reusable internal packages and dashboard systems in a monorepo environment
- Developed interactive charting and geological visualization modules with focus on performance and maintainability
- Worked across frontend and backend services using FastAPI, Laravel, and Node.js
- Contributed to desktop application evolution using Electron
- Improved maintainability and scalability of large datasets and complex domain workflows

Inovall Tecnologia Ltda — Natal, RN
FullStack Developer — 02/2022 – 10/2022

- Developed and maintained scalable web applications and internal systems
- Worked on frontend and backend features using modern JavaScript and PHP ecosystems
- Participated in API integrations and database management
- Collaborated with cross-functional teams to deliver production-ready solutions

Rabeets BR – Sócio Nerd — Natal, RN
FullStack Developer — 08/2021 – 02/2022

- Developed responsive web applications and custom frontend interfaces
- Implemented backend features and integrations for client-oriented solutions
- Worked closely with UI/UX and business requirements to deliver maintainable applications

Technical Skills & Interests

Frontend: React, Next.js, TypeScript, JavaScript, Angular, Vue, SCSS, LESS, Electron
Backend: Node.js, FastAPI, Django, Laravel, Spring Boot, Java, Python, PHP, REST APIs
Software Architecture & Engineering: DDD, Clean Architecture, SOLID, Design Patterns, Monorepo Architecture, Modular Systems, Microfrontends, Scalable Systems, Software Architecture
Databases: PostgreSQL, MongoDB, SQLite, MySQL, PouchDB

DevOps & Infrastructure: Docker, Terraform, Git, CI/CD, Linux
Mobile: React Native, Flutter
Languages: English (Advanced), Italian (Beginner)
Interests: Software Architecture, Scalable Systems, Frontend Engineering, Developer Experience, Technology Innovation

Leadership & Collaboration

- Frontend technical leadership in architecture and modernization initiatives
- Mentoring developers and supporting engineering best practices adoption
- Strong collaboration with product, engineering, and leadership teams
- Experience working in highly complex technical and domain-driven environments

Project Highlights

- Designed reusable charting/dashboard systems for geological data visualization
- Built modular frontend architectures with scalable package organization
- Participated in monorepo structuring for multi-project engineering environments
- Worked on desktop applications using Electron with local database strategies
- Developed import/export systems for complex geological datasets (LAS, CSV, spreadsheets)
- Implemented customizable crossplot and scientific visualization systems
- Applied DDD and Clean Architecture concepts in real production environments
